Executive Summary

This is the 22nd edition of state-by-state snapshots issued by the Joint Economic Committee during the 112th Congress and includes state-level data through September 2012.

This month's report shows that two out of three states gained private-sector jobs in September. Nationally, private-sector job gains totaled 104,000 during the month. Retail sales increased in September by 1.1 percent, after a gain of 1.2 percent in August. Manufacturing activity, as measured by the ISM Manufacturing Index, expanded in September, after three consecutive months of contraction.

Against this backdrop, this report highlights progress at the state level in creating private-sector jobs and reducing unemployment and tracks the employment changes in key sectors, including manufacturing and professional and business services.

Report highlights include:

- Thirty-three states and the District of Columbia added private-sector jobs in September. Texas (29,600) had the largest private-sector gains, followed by Pennsylvania (17,200) and California (14,900). In the past 12 months, 44 states and the District of Columbia gained private-sector jobs, with California (303,100), Texas (272,400) and New York (125,900) recording the largest gains. Maine, Mississippi, New Mexico, Rhode Island, Wisconsin and West Virginia lost private-sector positions during the last year. From September 2011 – September 2012, North Dakota (7.2 percent), Kentucky (3.2) and Texas (3.1 percent) had the largest percentage gains in private-sector employment. During this period, nearly 1.9 million private-sector positions were added nationally.
- Seventeen states had statistically significant decreases in the unemployment rate during September and the remaining states and the District of Columbia did not have changes that were significant. South Carolina (-0.5 percentage point) and California, Hawaii, Louisiana and Utah (-0.4 point each) had the largest declines. In the past 12 months, 20 states and the District of Columbia reported statistically significant decreases in the unemployment rate, with Nevada (-1.8 percentage points) recording the largest decline. Nevada (11.8 percent) had the highest unemployment rate in September, followed by Rhode Island (10.5 percent) and California (10.2 percent). North Dakota again had the lowest unemployment rate (3.0 percent). The national unemployment rate during the month was 7.8 percent, down from 9.0 percent a year earlier.

- Manufacturing employment expanded in just 13 states in September, as the nation lost 16,000 manufacturing jobs during the month. Texas added 3,800 manufacturing jobs, New Jersey gained 900 and Florida, Oklahoma, South Carolina and South Dakota each saw a gain of 700. In the past 12 months, 30 states added manufacturing positions, with the largest gains in the Midwest. Illinois (21,000), Indiana (19,500) and Texas (17,300) recorded the biggest gains in the past year. Overall, 174,000 manufacturing positions have been added across the country in the last 12 months.
- Thirty-two states added jobs in the professional and business services sector in September. Texas (13,600), Pennsylvania (7,900) and Illinois (7,800) posted the largest increases. In the past year, 40 states have added professional and business services jobs, with California, New York and Texas recording the largest gains. In the last year, 515,000 jobs were added in the professional and business services sector.
- Twenty-six states and the District of Columbia added jobs in the leisure and hospitality sector during September. California (10,700), Massachusetts (6,200) and Washington (4,700) saw the largest gains. In the past 12 months, 39 states and the District of Columbia added leisure and hospitality jobs. During this period, leisure and hospitality employment increased by 306,000 positions.

###

Economic Overview And Outlook: Alabama

JOBS

- Including September, the private sector has gained jobs nationwide for 31 consecutive months.
- In Alabama, private sector employment fell by 9.5 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 2.5 percent.
- In Alabama, employees in the construction, information services, and professional and business services sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Alabama have experienced the greatest employment increases: professional and business services; mining; and other services.*
- As the economy continues its emergence from the Great Recession, service-providing industries are projected to add the most jobs between 2010 and 2020. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and retail trade sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries while the number of manufacturing jobs is expected to fall.

EMPLOYMENT

- The unemployment rate in Alabama was 8.3 percent in September 2012, up 4.6 percentage points from December 2007, but down from its most recent peak of 10.6 percent in December 2009.
- 178,000 residents were counted among the unemployed in Alabama during September 2012.
- In Alabama, initial claims for unemployment insurance benefits totaled 24,325 during September, up 12.4 percent from the previous month. Since peaking at 51,448 in December 2008, initial claims for unemployment insurance benefits have declined by 52.7 percent.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 4.6 percent. Most recently, in the 2nd quarter of 2012, total personal income is 1.9 percent above its 4th quarter of 2007 level.
- Real per capita personal income (in 2005 \$) in Alabama was \$30,828.40 in the 2nd quarter of 2012, up from \$30,356.10 in the 2nd quarter of 2010.

HOUSING

- After peaking in the first quarter of 2007, national home prices have declined by 17.5 percent.
- In Alabama, home prices have fallen by 9.3 percent over 13 quarters from their peak in the first quarter of 2009.
- As of the 2nd quarter of 2012, 2.1 percent of all mortgages, including 5.9 percent of subprime mortgages, were in foreclosure in Alabama.
- Housing starts in Alabama totaled 10,930 units (seasonally adjusted annual rate) in August 2012, a decrease of 7.8 percent from July.
- Within the South census region, which includes Alabama, sales of new single-family homes totaled 174,000 units in August 2012, a decrease of 4.9 percent from July. Sales of existing single-family homes remained steady at 1,690,000 units (at seasonally adjusted annual rates) from August to September 2012.

How Does Alabama Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Alabama to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Alabama since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Alabama.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant are experiencing lower unemployment rates and smaller job losses than the national average.

STATE QUICK FACTS

		Alabama	United States
Unemployment Rates	September 2009	10.6%	9.8%
	September 2010	9.0%	9.5%

JOBS

- Including September, the private sector has gained jobs nationwide for 31 consecutive months.
- In Colorado, private sector employment fell by 7.7 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 4.4 percent.
- In Colorado, employees in the construction, manufacturing, and mining sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Colorado have experienced the greatest employment increases: mining; education and health services; and leisure and hospitality.*
- As the economy continues its emergence from the Great Recession, service-providing industries are projected to add the most jobs between 2010 and 2020. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and retail trade sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries while the number of manufacturing jobs is expected to fall.

EMPLOYMENT

- The unemployment rate in Colorado was 8.0 percent in September 2012, up 3.9 percentage points from December 2007, but down from its most recent peak of 9.0 percent in November 2010.
- 218,000 residents were counted among the unemployed in Colorado during September 2012.
- In Colorado, initial claims for unemployment insurance benefits totaled 14,456 during September, down 1.5 percent from the previous month. Since peaking at 25,007 in March 2009, initial claims for unemployment insurance benefits have declined by 42.2 percent.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 4.6 percent. Most recently, in the 2nd quarter of 2012, total personal income is 1.9 percent above its 4th quarter of 2007 level.
- Real per capita personal income (in 2005 \$) in Colorado was \$38,865.50 in the 2nd quarter of 2012, up from \$37,797.80 in the 2nd quarter of 2010.

HOUSING

- After peaking in the first quarter of 2007, national home prices have declined by 17.5 percent.
- In Colorado, home prices fell by 8.7 percent over 13 quarters from their peak in the first quarter of 2008. Since the second quarter of 2011, home prices in Colorado have risen by 1.4 percent.
- As of the 2nd quarter of 2012, 1.9 percent of all mortgages, including 6.2 percent of subprime mortgages, were in foreclosure in Colorado.
- Housing starts in Colorado totaled 25,890 units (seasonally adjusted annual rate) in August 2012, an increase of 12.9 percent from July.
- Within the West census region, which includes Colorado, sales of new single-family homes totaled 107,000 units in August 2012, an increase of 0.9 percent from July. Sales of existing single-family homes decreased 2.9 percent to 1,010,000 units (at seasonally adjusted annual rates) from August to September 2012.

How Does Colorado Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Colorado to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Colorado since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Colorado.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant are experiencing lower unemployment rates and smaller job losses than the national average.

Economic Overview And Outlook: Hawaii

JOBS

- Including September, the private sector has gained jobs nationwide for 31 consecutive months.
- In Hawaii, private sector employment fell by 8.5 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 4.6 percent.
- In Hawaii, employees in the natural resources, mining, construction, trade, transportation and utilities, and manufacturing sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Hawaii have experienced the greatest employment increases: leisure and hospitality; professional and business services; and trade, transportation and utilities.*
- As the economy continues its emergence from the Great Recession, service-providing industries are projected to add the most jobs between 2010 and 2020. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and retail trade sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries while the number of manufacturing jobs is expected to fall.

EMPLOYMENT

- The unemployment rate in Hawaii was 5.7 percent in September 2012, up 2.7 percentage points from December 2007, but down from its most recent peak of 7.1 percent in December 2009.
- 37,000 residents were counted among the unemployed in Hawaii during September 2012.
- In Hawaii, initial claims for unemployment insurance benefits totaled 7,489 during September, up 3.9 percent from the previous month. Since peaking at 11,570 in August 2009, initial claims for unemployment insurance benefits have declined by 35.3 percent.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 4.6 percent. Most recently, in the 2nd quarter of 2012, total personal income is 1.9 percent above its 4th quarter of 2007 level.

- Real per capita personal income (in 2005 \$) in Hawaii was \$38,036.90 in the 2nd quarter of 2012, up from \$36,809.20 in the 2nd quarter of 2010.

HOUSING

- After peaking in the first quarter of 2007, national home prices have declined by 17.5 percent.
- In Hawaii, home prices have fallen by 16.8 percent over 20 quarters from their peak in the second quarter of 2007.
- As of the 2nd quarter of 2012, 4.7 percent of all mortgages, including 20.8 percent of subprime mortgages, were in foreclosure in Hawaii.
- Housing starts in Hawaii totaled 1,710 units (seasonally adjusted annual rate) in August 2012, a decrease of 40.6 percent from July.
- Within the West census region, which includes Hawaii, sales of new single-family homes totaled 107,000 units in August 2012, an increase of 0.9 percent from July. Sales of existing single-family homes decreased 2.9 percent to 1,010,000 units (at seasonally adjusted annual rates) from August to September 2012.

How Does Hawaii Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Hawaii to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Hawaii since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Hawaii.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant are experiencing lower unemployment rates and smaller job losses than the national average.

STATE QUICK FACTS

		Hawaii	United States
Unemployment Rates	September 2009	7.1%	9.8%
	September 2010	6.9%	9.5%
	September 2011	6.8%	9.0%

Economic Overview And Outlook: Kentucky

JOBS

- Including September, the private sector has gained jobs nationwide for 31 consecutive months.
- In Kentucky, private sector employment fell by 8.0 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 6.2 percent.
- In Kentucky, employees in the manufacturing, construction, and information services sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Kentucky have experienced the greatest employment increases: professional and business services; leisure and hospitality; and manufacturing.*
- As the economy continues its emergence from the Great Recession, service-providing industries are projected to add the most jobs between 2010 and 2020. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and retail trade sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries while the number of manufacturing jobs is expected to fall.

EMPLOYMENT

- The unemployment rate in Kentucky was 8.4 percent in September 2012, up 2.8 percentage points from December 2007, but down from its most recent peak of 10.7 percent in January 2010.
- 174,000 residents were counted among the unemployed in Kentucky during September 2012.
- In Kentucky, initial claims for unemployment insurance benefits totaled 22,955 during September, down 7.9 percent from the previous month. Since peaking at 60,225 in February 2009, initial claims for unemployment insurance benefits have declined by 61.9 percent.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 4.6 percent. Most recently, in the 2nd quarter of 2012, total personal income is 1.9 percent above its 4th quarter of 2007 level.

- Real per capita personal income (in 2005 \$) in Kentucky was \$30,413.60 in the 2nd quarter of 2012, up from \$29,296.10 in the 2nd quarter of 2010.

HOUSING

- After peaking in the first quarter of 2007, national home prices have declined by 17.5 percent.
- In Kentucky, home prices fell by 3.5 percent over 9 quarters from their peak in the first quarter of 2009. Since the second quarter of 2011, home prices in Kentucky have risen by 0.7 percent.
- As of the 2nd quarter of 2012, 3.8 percent of all mortgages, including 11.8 percent of subprime mortgages, were in foreclosure in Kentucky.
- Housing starts in Kentucky totaled 7,990 units (seasonally adjusted annual rate) in August 2012, an increase of 25.0 percent from July.
- Within the South census region, which includes Kentucky, sales of new single-family homes totaled 174,000 units in August 2012, a decrease of 4.9 percent from July. Sales of existing single-family homes remained steady at 1,690,000 units (at seasonally adjusted annual rates) from August to September 2012.

How Does Kentucky Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Kentucky to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Kentucky since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Kentucky.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant are experiencing lower unemployment rates and smaller job losses than the national average.

Economic Overview And Outlook: Minnesota

JOBS

- Including September, the private sector has gained jobs nationwide for 31 consecutive months.
- In Minnesota, private sector employment fell by 6.4 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 4.1 percent.
- In Minnesota, employees in the mining, construction, and manufacturing sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Minnesota have experienced the greatest employment increases: mining; professional and business services; and education and health services.*
- As the economy continues its emergence from the Great Recession, service-providing industries are projected to add the most jobs between 2010 and 2020. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and retail trade sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries while the number of manufacturing jobs is expected to fall.

EMPLOYMENT

- The unemployment rate in Minnesota was 5.8 percent in September 2012, up 1.0 percentage point from December 2007, but down from its most recent peak of 8.3 percent in June 2009.
- 173,000 residents were counted among the unemployed in Minnesota during September 2012.
- In Minnesota, initial claims for unemployment insurance benefits totaled 23,722 during September, up 9.0 percent from the previous month. Since peaking at 49,423 in July 2011, initial claims for unemployment insurance benefits have declined by 52.0 percent.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 4.6 percent. Most recently, in the 2nd quarter of 2012, total personal income is 1.9 percent above its 4th quarter of 2007 level.
- Real per capita personal income (in 2005 \$) in Minnesota was \$39,785.20 in the 2nd quarter of 2012, up from \$38,115.10 in the 2nd quarter of 2010.

HOUSING

- After peaking in the first quarter of 2007, national home prices have declined by 17.5 percent.
- In Minnesota, home prices have fallen by 20.7 percent over 21 quarters from their peak in the first quarter of 2007.
- As of the 2nd quarter of 2012, 2.3 percent of all mortgages, including 9.4 percent of subprime mortgages, were in foreclosure in Minnesota.
- Housing starts in Minnesota totaled 12,790 units (seasonally adjusted annual rate) in August 2012, a decrease of 15.1 percent from July.
- Within the Midwest census region, which includes Minnesota, sales of new single-family homes totaled 56,000 units in August 2012, an increase of 1.8 percent from July. Sales of existing single-family homes decreased 1.0 percent to 1,030,000 units (at seasonally adjusted annual rates) from August to September 2012.

How Does Minnesota Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Minnesota to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Minnesota since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Minnesota.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant are experiencing lower unemployment rates and smaller job losses than the national average.

STATE QUICK FACTS

		Minnesota	United States
Unemployment Rates	September 2009	7.9%	9.8%
	September 2010	7.2%	9.5%

Economic Overview And Outlook: New Hampshire

JOBS

- Including September, the private sector has gained jobs nationwide for 31 consecutive months.
- In New Hampshire, private sector employment fell by 5.8 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 1.4 percent.
- In New Hampshire, employees in the construction, manufacturing, and professional and business services sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in New Hampshire have experienced the greatest employment increases: other services; leisure and hospitality; and professional and business services.*
- As the economy continues its emergence from the Great Recession, service-providing industries are projected to add the most jobs between 2010 and 2020. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and retail trade sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries while the number of manufacturing jobs is expected to fall.

EMPLOYMENT

- The unemployment rate in New Hampshire was 5.7 percent in September 2012, up 2.3 percentage points from December 2007, but down from its most recent peak of 6.7 percent in January 2010.
- 42,000 residents were counted among the unemployed in New Hampshire during September 2012.
- In New Hampshire, initial claims for unemployment insurance benefits totaled 5,426 during September, down 8.0 percent from the previous month. Since peaking at 10,653 in March 2009, initial claims for unemployment insurance benefits have declined by 49.1 percent.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 4.6 percent. Most recently, in the 2nd quarter of 2012, total personal income is 1.9 percent above its 4th quarter of 2007 level.

- Real per capita personal income (in 2005 \$) in New Hampshire was \$40,724.30 in the 2nd quarter of 2012, up from \$39,821.80 in the 2nd quarter of 2010.

HOUSING

- After peaking in the first quarter of 2007, national home prices have declined by 17.5 percent.
- In New Hampshire, home prices have fallen by 18.7 percent over 25 quarters from their peak in the first quarter of 2006.
- As of the 2nd quarter of 2012, 2.4 percent of all mortgages, including 8.3 percent of subprime mortgages, were in foreclosure in New Hampshire.
- Housing starts in New Hampshire totaled 3,760 units (seasonally adjusted annual rate) in August 2012, an increase of 48.6 percent from July.
- Within the Northeast census region, which includes New Hampshire, sales of new single-family homes totaled 36,000 units in August 2012, an increase of 20.0 percent from July. Sales of existing single-family homes decreased 7.7 percent to 480,000 units (at seasonally adjusted annual rates) from August to September 2012.

How Does New Hampshire Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare New Hampshire to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within New Hampshire since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in New Hampshire.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant are experiencing lower unemployment rates and smaller job losses than the national average.

JOBS

- Including September, the private sector has gained jobs nationwide for 31 consecutive months.
- In Ohio, private sector employment fell by 8.7 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 4.6 percent.
- In Ohio, employees in the manufacturing, construction, and professional and business services sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Ohio have experienced the greatest employment increases: professional and business services; manufacturing; and education and health services.*
- As the economy continues its emergence from the Great Recession, service-providing industries are projected to add the most jobs between 2010 and 2020. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and retail trade sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries while the number of manufacturing jobs is expected to fall.

EMPLOYMENT

- The unemployment rate in Ohio was 7.0 percent in September 2012, up 1.3 percentage point from December 2007, but down from its most recent peak of 10.6 percent in January 2010.
- 406,000 residents were counted among the unemployed in Ohio during September 2012.
- In Ohio, initial claims for unemployment insurance benefits totaled 54,230 during September, up 0.7 percent from the previous month. Since peaking at 122,356 in February 2009, initial claims for unemployment insurance benefits have declined by 55.7 percent.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 4.6 percent. Most recently, in the 2nd quarter of 2012, total personal income is 1.9 percent above its 4th quarter of 2007 level.

- Real per capita personal income (in 2005 \$) in Ohio was \$33,807.70 in the 2nd quarter of 2012, up from \$32,302.30 in the 2nd quarter of 2010.

HOUSING

- After peaking in the first quarter of 2007, national home prices have declined by 17.5 percent.
- In Ohio, home prices have fallen by 11.0 percent over 21 quarters from their peak in the first quarter of 2007.
- As of the 2nd quarter of 2012, 4.9 percent of all mortgages, including 11.5 percent of subprime mortgages, were in foreclosure in Ohio.
- Housing starts in Ohio totaled 16,670 units (seasonally adjusted annual rate) in August 2012, unchanged from July.
- Within the Midwest census region, which includes Ohio, sales of new single-family homes totaled 56,000 units in August 2012, an increase of 1.8 percent from July. Sales of existing single-family homes decreased 1.0 percent to 1,030,000 units (at seasonally adjusted annual rates) from August to September 2012.

How Does Ohio Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Ohio to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Ohio since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Ohio.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant are experiencing lower unemployment rates and smaller job losses than the national average.

JOBS

- Including September, the private sector has gained jobs nationwide for 31 consecutive months.
- In South Dakota, private sector employment fell by 3.9 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 2.6 percent.
- In South Dakota, employees in the manufacturing, natural resources, mining, construction, and information services sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in South Dakota have experienced the greatest employment increases: manufacturing; professional and business services; and education and health services.*
- As the economy continues its emergence from the Great Recession, service-providing industries are projected to add the most jobs between 2010 and 2020. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and retail trade sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries while the number of manufacturing jobs is expected to fall.

EMPLOYMENT

- The unemployment rate in South Dakota was 4.4 percent in September 2012, up 1.7 percentage points from December 2007, but down from its most recent peak of 5.3 percent in February 2010.
- 20,000 residents were counted among the unemployed in South Dakota during September 2012.
- In South Dakota, initial claims for unemployment insurance benefits totaled 1,740 during September, up 9.8 percent from the previous month. Since peaking at 3,750 in March 2009, initial claims for unemployment insurance benefits have declined by 53.6 percent.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 4.6 percent. Most recently, in the 2nd quarter of 2012, total personal income is 1.9 percent above its 4th quarter of 2007 level.

- Real per capita personal income (in 2005 \$) in South Dakota was \$39,316.30 in the 2nd quarter of 2012, up from \$35,366.60 in the 2nd quarter of 2010.

HOUSING

- After peaking in the first quarter of 2007, national home prices have declined by 17.5 percent.
- In South Dakota, home prices have risen by less than half a percent from the previous peak set in the first quarter of 2009.
- As of the 2nd quarter of 2012, 1.5 percent of all mortgages, including 10.5 percent of subprime mortgages, were in foreclosure in South Dakota.
- Housing starts in South Dakota totaled 3,690 units (seasonally adjusted annual rate) in August 2012, a decrease of 7.8 percent from July.
- Within the Midwest census region, which includes South Dakota, sales of new single-family homes totaled 56,000 units in August 2012, an increase of 1.8 percent from July. Sales of existing single-family homes decreased 1.0 percent to 1,030,000 units (at seasonally adjusted annual rates) from August to September 2012.

How Does South Dakota Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare South Dakota to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within South Dakota since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in South Dakota.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant are experiencing lower unemployment rates and smaller job losses than the national average.

JOBS

- Including September, the private sector has gained jobs nationwide for 31 consecutive months.
- In Washington, private sector employment fell by 8.5 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 5.3 percent.
- In Washington, employees in the mining, construction, and manufacturing sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Washington have experienced the greatest employment increases: manufacturing; professional and business services; and leisure and hospitality.*
- As the economy continues its emergence from the Great Recession, service-providing industries are projected to add the most jobs between 2010 and 2020. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and retail trade sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries while the number of manufacturing jobs is expected to fall.

EMPLOYMENT

- The unemployment rate in Washington was 8.5 percent in September 2012, up 3.9 percentage points from December 2007, but down from its most recent peak of 10.2 percent in March 2010.
- 296,000 residents were counted among the unemployed in Washington during September 2012.
- In Washington, initial claims for unemployment insurance benefits totaled 41,605 during September, up 2.6 percent from the previous month. Since peaking at 70,917 in February 2009, initial claims for unemployment insurance benefits have declined by 41.3 percent.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 4.6 percent. Most recently, in the 2nd quarter of 2012, total personal income is 1.9 percent above its 4th quarter of 2007 level.

- Real per capita personal income (in 2005 \$) in Washington was \$39,043.30 in the 2nd quarter of 2012, up from \$37,865.80 in the 2nd quarter of 2010.

HOUSING

- After peaking in the first quarter of 2007, national home prices have declined by 17.5 percent.
- In Washington, home prices have fallen by 24.1 percent over 18 quarters from their peak in the fourth quarter of 2007.
- As of the 2nd quarter of 2012, 2.7 percent of all mortgages, including 10.7 percent of subprime mortgages, were in foreclosure in Washington.
- Housing starts in Washington totaled 28,390 units (seasonally adjusted annual rate) in August 2012, an increase of 2.0 percent from July.
- Within the West census region, which includes Washington, sales of new single-family homes totaled 107,000 units in August 2012, an increase of 0.9 percent from July. Sales of existing single-family homes decreased 2.9 percent to 1,010,000 units (at seasonally adjusted annual rates) from August to September 2012.

How Does Washington Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Washington to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Washington since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Washington.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant are experiencing lower unemployment rates and smaller job losses than the national average.

EXPLANATION OF NET JOB LOSS AND UNEMPLOYMENT RATE CHART

The chart on the following page shows a comparison of the current (September 2012) unemployment rate and cumulative nonfarm job losses (as a percent of total employment) in each state and the District of Columbia versus the national average. States that appear in the upper right quadrant are experiencing unemployment rates higher than the national average and cumulative job losses greater than the national average. States in the lower left quadrant are experiencing lower unemployment rates and smaller job losses than the national average.

Meanwhile, states in the upper left quadrant experienced net job losses greater than the national average but have a current unemployment rate lower than the national average, and states located in the lower right quadrant have experienced job losses below the national average even as their unemployment rate remains above the national average.

Most states experienced significant job losses during the recession. Between December 2007 and June 2009, forty-eight states and the District of Columbia saw declines in payroll employment. Only Alaska and North Dakota saw their payrolls increase during this period. Job growth has resumed in most states in the last two years of the recovery; forty-four states and the District of Columbia experienced net job gains from July 2010 to September 2012. Four states – Louisiana, New York, Oklahoma, and Texas – and the District of Columbia have recovered all the jobs that were lost during the recession.

Net Job Loss from Recession's Onset and September 2012 Unemployment Rate

Unemployment rate above national rate;
Job losses larger than US total

Unemployment rate below national rate;
Job losses smaller than US total

United States:
7.8% Unemployment;
Job losses totaling 3.2%

NV

Current Unemployment Rate

Unemployment rate above national rate;
