Joint Economic Committee Democratic staff calculations based on Congressional Budget Office projections (<https://www.cbo.gov/system/files/115th-congress-2017-2018/costestimate/hr1628aspassed.pdf>) and data from the Kaiser Family Foundation (<http://kff.org/health-reform/issue-brief/2017-premium-changes-and-insurer-participation-in-the-affordable-care-acts-health-insurance-marketplaces/> and <http://kff.org/other/state-indicator/nonelderly-0-64/?currentTimeframe=0&sortModel=%7B%22colld%22:%22Location%22,%22sort%22:%22asc%22%7D>).

Premium increases are based on the second lowest cost silver benchmark health plan for a 40-year-old non-smoker making \$30,000 a year and CBO projections. Premiums are before tax credits.

Premiums for each state are based on the premium for a major city in each state. Decreases in coverage assume that the projected decreases in coverage are divided proportionally along with the current size of the insured population for each category. Number losing private coverage just looks at those losing coverage on the individual market and through their employers. Increased cost in uncompensated care uses the estimate that each additional uninsured person costs local hospitals \$900 per year (<https://insight.kellogg.northwestern.edu/article/who-bears-the-cost-of-the-uninsured-nonprofit-hospitals>).
