UNDERSTANDING
THE ECONOMY:

STATE-BY-STATE SNAPSHOTS

A REPORT BY THE JOINT ECONOMIC COMMITTEE
SENATOR BOB CASEY, CHAIRMAN-DESIGNATE

EXECUTIVE SUMMARY

This is the second edition of state-by-state snapshots issued by the Chairman-designate of the Joint Economic Committee during the 112th Congress and includes data through January 2011. In recent months, the economy has gained strength and this is reflected in a broad range of economic data.

- In the past 12 months (March 2010 – February 2011), 1.5 million private sector jobs have been created. During that same time period, unemployment has declined from 9.7 percent to 8.9 percent.
- Gross domestic product grew by 2.8 percent in the fourth quarter of 2010, the sixth consecutive quarter of economic expansion.
- Retail sales have increased for eight straight months, a sign that consumers are feeling more confident about their economic prospects.
- The ISM Manufacturing Index shows that economic activity in the manufacturing sector has expanded for 19 consecutive months and currently is at its highest level since May 2004.
- Even with the spike in gasoline prices in February, from \$3.10 to \$3.38 per gallon, auto sales increased by 27 percent during February from a year earlier.

This month's state-by-state report looks at how the economic progress nationally is translating to individual states. The report highlights progress in creating private sector jobs and reducing unemployment and tracks the employment gains in key sectors, including manufacturing and professional and business services.

- Thirty-four states and the District of Columbia added private sector jobs in January. Small states recorded the largest expansion of private sector payrolls in percent terms, with Vermont's private sector employment growing by 2.0 percent, Idaho (1.4 percent) and Maine (1.3 percent.) Midwestern states achieved the largest gains in the number of jobs, with Michigan adding 40,500 private sector positions, Texas (38,600), Ohio (33,100) and Illinois (27,100).
- Since the end of 2009, thirty-eight states and the District of Columbia have added private sector jobs in at least 7 of the last 13 months.

- Twenty-four states saw their unemployment rates decline in January. Nevada (-0.7 percent) had the largest decline. Indiana, Michigan and South Carolina each recorded a drop of 0.4 percent. Other states that showed statistically significant declines in the unemployment rate were Pennsylvania (-0.3 percent), Maryland (-0.2 percent) and Nebraska (-0.1 percent). Even with its decline, Nevada had the highest unemployment rate (14.2 percent), followed by California (12.4 percent) and Florida (11.9 percent). Overall, unemployment in the United States decreased by 0.4 percent from December to January.
- Thirty-one states recorded job gains in the manufacturing sector, with Michigan leading the way. Michigan's manufacturing employment increased by 4.2 percent, adding 20,100 jobs during the month. Idaho (2.3 percent increase) and Missouri (1.9 percent increase) were the other top percent gainers. After Michigan, the states which added the largest number of manufacturing jobs were: Texas (5,600), Missouri (4,700), Wisconsin (4,200), and Illinois and Pennsylvania (each with gain of 4,100).
- Thirty-nine states added jobs in the professional and business services sector during January. Forty-four states and the District of Columbia have added jobs in the sector during at least 7 of the last 13 months. In January, Vermont (2.6 percent increase), West Virginia (2.1 percent), and Iowa (2.0 percent) enjoyed the largest percent gains. Massachusetts added the most professional and business service sector jobs (6,700), followed by Ohio (6,100), and Washington (5,500).

The attached state pages highlight the following key economic statistics for each state:

- Jobs created or lost since the start of the recession;
- Jobs saved or created by the Recovery Act;
- Unemployment rates;
- Per capita earnings; and,
- The condition of the housing sector.

Economic Overview And Outlook: Alabama

JOBS

- In January, the private sector gained jobs nationwide for 11 consecutive months.
- The President's Council of Economic Advisers estimates that investments made through the Recovery Act have boosted employment in Alabama by 44,000 jobs through the 3rd quarter of 2010.
- In Alabama, private sector employment fell by 9.4 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 0.1 percent.
- In Alabama, employees in the construction, professional and business services, and information services sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Alabama have experienced the greatest employment increases: professional and business services; education and health services; and trade, transportation and utilities.*
- As the economy recovers from the Great Recession, service-providing industries are projected to add the most jobs between 2008 and 2018, with the largest gains in professional and business services, education, health care and social assistance, and State and local government. Within the goods-producing sector of the economy, only the construction industry is projected to add jobs above its 2008 level.

EMPLOYMENT

- The unemployment rate in Alabama was 9.3 percent in January 2011, up 5.5 percentage points from December 2007, but down from its most recent peak of 10.4 percent reached in December 2009.
- 196,000 Alabama residents were counted among the unemployed in Alabama during January 2011.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 2.2 percent. Most recently, in the 3rd quarter of 2010, total personal income is 0.2 percent below its 4th quarter of 2007 level.

- Real per capita personal income (in 2005 \$) in Alabama was \$30,891.70 in the 3rd quarter of 2010, up from \$30,737.40 in the 3rd quarter of 2008.

HOUSING

- National home prices, including distressed sales, saw a decrease of 5.7 percent in January 2011 from January 2010 compared to a 4.7 percent decrease in December. In Alabama, home prices saw a decrease of 12.1 percent in January 2011 from January 2010 following December's year over year decrease of 11.8 percent.
- The median price of single-family homes in Alabama was \$128,969 in the second quarter of 2010, compared to \$180,176 nationwide.
- As of the 4th quarter of 2010, 2.2 percent of all mortgages, including 8.0 percent of subprime mortgages, were in foreclosure in Alabama.
- Housing starts in Alabama totaled 15,320 units (seasonally adjusted annual rate) in January 2011, an increase of 29.4 percent from December.
- Within the South census region, which includes Alabama, sales of new single-family homes totaled 143,000 units in January 2011, a decrease of 12.8 percent from December. Sales of existing single-family homes increased 2.9 percent to 1,790,000 units (at seasonally adjusted annual rates) from December to January 2011.

How Does Alabama Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Alabama to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Alabama since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Alabama.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates job losses (or even gains) lower than the national average.

STATE QUICK FACTS

		Alabama	United States
Unemployment Rates	January 2008	3.9%	5.0%

How Does Colorado Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Colorado to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Colorado since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Colorado.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates and job losses (or even gains) lower than the national average.

STATE QUICK FACTS

		Colorado	United States
Unemployment Rates	January 2008	4.1%	5.0%
	January 2009	6.8%	7.8%
	January 2010	8.9%	9.7%
	January 2011	9.1%	9.0%
Percent of Population Who Are Veterans	2009	7.8%	7.1%
Veterans' Unemployment Rate	2009	7.3%	8.9%
Median Household Income	2007	\$ 63,249	\$ 51,965
	(2009 \$) 2009	\$ 55,930	\$ 49,777
Poverty Rate	2007	9.8%	12.5%
	2009	12.3%	14.3%

How Does Hawaii Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Hawaii to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Hawaii since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Hawaii.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates job losses (or even gains) lower than the national average.

Economic Overview And Outlook: Idaho

JOBS

- In January, the private sector gained jobs nationwide for 11 consecutive months.
- The President's Council of Economic Advisers estimates that investments made through the Recovery Act have boosted employment in Idaho by 15,000 jobs through the 3rd quarter of 2010.
- In Idaho, private sector employment fell by 9.7 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 1.8 percent.
- In Idaho, employees in the mining, construction, and manufacturing sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Idaho have experienced the greatest employment increases: mining; education and health services; and other services.*
- As the economy recovers from the Great Recession, service-providing industries are projected to add the most jobs between 2008 and 2018, with the largest gains in professional and business services, education, health care and social assistance, and State and local government. Within the goods-producing sector of the economy, only the construction industry is projected to add jobs above its 2008 level.

EMPLOYMENT

- The unemployment rate in Idaho was 9.7 percent in January 2011, up 6.4 percentage points from December 2007, matching its most recent peak reached in December 2010.
- 74,000 Idaho residents were counted among the unemployed in Idaho during January 2011.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 2.2 percent. Most recently, in the 3rd quarter of 2010, total personal income is 0.2 percent below its 4th quarter of 2007 level.

- Real per capita personal income (in 2005 \$) in Idaho was \$29,056.90 in the 3rd quarter of 2010, down from \$29,808.40 in the 3rd quarter of 2008.

HOUSING

- National home prices, including distressed sales, saw a decrease of 5.7 percent in January 2011 from January 2010 compared to a 4.7 percent decrease in December. In Idaho, home prices saw a decrease of 15.7 percent in January 2011 from January 2010 following December's year over year decrease of 13.6 percent.
- The median price of single-family homes in Idaho was \$140,436 in the second quarter of 2010, compared to \$180,176 nationwide.
- As of the 4th quarter of 2010, 3.6 percent of all mortgages, including 12.5 percent of subprime mortgages, were in foreclosure in Idaho.
- Housing starts in Idaho totaled 2,920 units (seasonally adjusted annual rate) in January 2011, an increase of 62.2 percent from December.
- Within the West census region, which includes Idaho, sales of new single-family homes totaled 66,000 units in January 2011, a decrease of 36.5 percent from December. Sales of existing single-family homes increased 6.9 percent to 1,240,000 units (at seasonally adjusted annual rates) from December to January 2011.

How Does Kentucky Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Kentucky to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Kentucky since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Kentucky.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates job losses (or even gains) lower than the national average.

Economic Overview And Outlook: Louisiana

JOBS

- In January, the private sector gained jobs nationwide for 11 consecutive months.
- The President's Council of Economic Advisers estimates that investments made through the Recovery Act have boosted employment in Louisiana by 41,000 jobs through the 3rd quarter of 2010.
- In Louisiana, private sector employment fell by 4.2 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 1.4 percent.
- In Louisiana, employees in the information services, manufacturing, and professional and business services sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Louisiana have experienced the greatest employment increases: information services; mining; and professional and business services.*
- As the economy recovers from the Great Recession, service-providing industries are projected to add the most jobs between 2008 and 2018, with the largest gains in professional and business services, education, health care and social assistance, and State and local government. Within the goods-producing sector of the economy, only the construction industry is projected to add jobs above its 2008 level.

EMPLOYMENT

- The unemployment rate in Louisiana was 7.8 percent in January 2011, up 4.1 percentage points from December 2007, surpassing its most recent peak of 7.7 percent reached in December 2010.
- 162,000 Louisiana residents were counted among the unemployed in Louisiana during January 2011.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 2.2 percent. Most recently, in the 3rd quarter of 2010, total personal income is 0.2 percent below its 4th quarter of 2007 level.

- Real per capita personal income (in 2005 \$) in Louisiana was \$34,494.10 in the 3rd quarter of 2010, down from \$34,600.90 in the 3rd quarter of 2008.

HOUSING

- National home prices, including distressed sales, saw a decrease of 5.7 percent in January 2011 from January 2010 compared to a 4.7 percent decrease in December. In Louisiana, home prices saw a decrease of 0.2 percent in January 2011 from January 2010 following December's year over year decrease of 3.3 percent.
- The median price of single-family homes in Louisiana was \$152,413 in the second quarter of 2010, compared to \$180,176 nationwide.
- As of the 4th quarter of 2010, 3.7 percent of all mortgages, including 11.9 percent of subprime mortgages, were in foreclosure in Louisiana.
- Housing starts in Louisiana totaled 12,680 units (seasonally adjusted annual rate) in January 2011, a decrease of 5.0 percent from December.
- Within the South census region, which includes Louisiana, sales of new single-family homes totaled 143,000 units in January 2011, a decrease of 12.8 percent from December. Sales of existing single-family homes increased 2.9 percent to 1,790,000 units (at seasonally adjusted annual rates) from December to January 2011.

How Does Minnesota Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Minnesota to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Minnesota since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Minnesota.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates job losses (or even gains) lower than the national average.

STATE QUICK FACTS

		Minnesota	United States
Unemployment Rates	January 2008	4.7%	5.0%
	January 2009	7.3%	7.8%
	January 2010	7.8%	9.7%
	January 2011	6.7%	9.0%

How Does New Hampshire Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare New Hampshire to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within New Hampshire since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in New Hampshire.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates job losses (or even gains) lower than the national average.

How Does Ohio Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Ohio to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Ohio since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Ohio.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates job losses (or even gains) lower than the national average.

How Does South Dakota Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare South Dakota to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within South Dakota since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in South Dakota.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates job losses (or even gains) lower than the national average.

Economic Overview And Outlook: Tennessee

JOBS

- In January, the private sector gained jobs nationwide for 11 consecutive months.
- The President's Council of Economic Advisers estimates that investments made through the Recovery Act have boosted employment in Tennessee by 63,000 jobs through the 3rd quarter of 2010.
- In Tennessee, private sector employment fell by 9.1 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 1.4 percent.
- In Tennessee, employees in the construction, manufacturing, and professional and business services sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Tennessee have experienced the greatest employment increases: professional and business services; construction; and education and health services.*
- As the economy recovers from the Great Recession, service-providing industries are projected to add the most jobs between 2008 and 2018, with the largest gains in professional and business services, education, health care and social assistance, and State and local government. Within the goods-producing sector of the economy, only the construction industry is projected to add jobs above its 2008 level.

EMPLOYMENT

- The unemployment rate in Tennessee was 9.5 percent in January 2011, up 4.1 percentage points from December 2007, but down from its most recent peak of 10.8 percent reached in August 2009.
- 290,000 Tennessee residents were counted among the unemployed in Tennessee during January 2011.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 2.2 percent. Most recently, in the 3rd quarter of 2010, total personal income is 0.2 percent below its 4th quarter of 2007 level.

- Real per capita personal income (in 2005 \$) in Tennessee was \$31,856.00 in the 3rd quarter of 2010, up from \$31,823.00 in the 3rd quarter of 2008.

HOUSING

- National home prices, including distressed sales, saw a decrease of 5.7 percent in January 2011 from January 2010 compared to a 4.7 percent decrease in December. In Tennessee, home prices saw a decrease of 4.3 percent in January 2011 from January 2010 following December's year over year decrease of 3.6 percent.
- The median price of single-family homes in Tennessee was \$123,613 in the second quarter of 2010, compared to \$180,176 nationwide.
- As of the 4th quarter of 2010, 2.6 percent of all mortgages, including 7.0 percent of subprime mortgages, were in foreclosure in Tennessee.
- Housing starts in Tennessee totaled 10,760 units (seasonally adjusted annual rate) in January 2011, a decrease of 13.2 percent from December.
- Within the South census region, which includes Tennessee, sales of new single-family homes totaled 143,000 units in January 2011, a decrease of 12.8 percent from December. Sales of existing single-family homes increased 2.9 percent to 1,790,000 units (at seasonally adjusted annual rates) from December to January 2011.

How Does Washington Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Washington to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Washington since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Washington.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates job losses (or even gains) lower than the national average.

Economic Overview And Outlook: West Virginia

JOBS

- In January, the private sector gained jobs nationwide for 11 consecutive months.
- The President's Council of Economic Advisers estimates that investments made through the Recovery Act have boosted employment in West Virginia by 16,000 jobs through the 3rd quarter of 2010.
- In West Virginia, private sector employment fell by 4.7 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 2.0 percent.
- In West Virginia, employees in the manufacturing, construction, and trade, transportation and utilities sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in West Virginia have experienced the greatest employment increases: mining; professional and business services; and leisure and hospitality.*
- As the economy recovers from the Great Recession, service-providing industries are projected to add the most jobs between 2008 and 2018, with the largest gains in professional and business services, education, health care and social assistance, and State and local government. Within the goods-producing sector of the economy, only the construction industry is projected to add jobs above its 2008 level.

EMPLOYMENT

- The unemployment rate in West Virginia was 9.6 percent in January 2011, up 5.5 percentage points from December 2007, but down from its most recent peak of 9.7 percent reached in December 2010.
- 75,000 West Virginia residents were counted among the unemployed in West Virginia during January 2011.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 2.2 percent. Most recently, in the 3rd quarter of 2010, total personal income is 0.2 percent below its 4th quarter of 2007 level.

- Real per capita personal income (in 2005 \$) in West Virginia was \$29,799.80 in the 3rd quarter of 2010, up from \$28,728.60 in the 3rd quarter of 2008.

HOUSING

- National home prices, including distressed sales, saw a decrease of 5.7 percent in January 2011 from January 2010 compared to a 4.7 percent decrease in December. In West Virginia, home prices saw a significant improvement of 5.5 percent in January 2011 from January 2010 following December's year over year increase of 4.3 percent.
- The median price of single-family homes in West Virginia was \$129,369 in the second quarter of 2010, compared to \$180,176 nationwide.
- As of the 4th quarter of 2010, 2.3 percent of all mortgages, including 7.9 percent of subprime mortgages, were in foreclosure in West Virginia.
- Housing starts in West Virginia totaled 1,160 units (seasonally adjusted annual rate) in January 2011, an increase of 4.5 percent from December.
- Within the South census region, which includes West Virginia, sales of new single-family homes totaled 143,000 units in January 2011, a decrease of 12.8 percent from December. Sales of existing single-family homes increased 2.9 percent to 1,790,000 units (at seasonally adjusted annual rates) from December to January 2011.
