

Median Income of Households Headed by 25- to 34-Year-Olds

2014 dollars

Households headed by Millennials today earn about \$1,200 less than 25- to 34-year-olds in 1979

Source: U.S. Census Bureau

Notes: Millennials are generally defined as those born starting in 1980 and through 2000, meaning the first millennials turned 25 years old in 2005 and the 25- to 34-year-old age group entirely consisted of millennials in 2014; data may overstate income since young adults living with their parents are excluded since they are not heads of households; grey areas represent periods of recession as determined by the National Bureau of Economic Research; data labels rounded to nearest hundred dollars
