

Social Security Disability Insurance Prevalence Rates

Change in the percentage of people insured for SSDI that are receiving benefits since 1980

More than half of the change in the prevalence rate of SSDI since 1980 is due to population aging and the increase of women in the workforce

Source: JEC staff calculations using data through 2014 from the Social Security Administration, The 2015 Annual Report of the Board of Trustees of the Federal Old-Age and Survivors Insurance and Federal Disability Insurance Trust Funds

Note: Data for the "Age-Sex Adjusted Rate" are adjusted to the distribution of the insured population for the year 2000
