

Economic Overview And Outlook: Alabama

JOBS

- Across the country, job losses have slowed dramatically since President Obama took office, nearly coming to a halt. Congress and the Administration worked swiftly to pass the American Recovery and Reinvestment Act, which has boosted employment by an estimated 2.8 million jobs since it was enacted.
- The President's Council of Economic Advisers estimates that investments made through the Recovery Act have boosted employment in Alabama by 38,000 jobs through the 1st quarter of 2010.
- In Alabama, employees in the construction, information services, and trade, transportation and utilities sectors faced the largest job losses (as a percent of employment within an industry) over the recession. In 2010, the following sectors in Alabama experienced the greatest employment increases: leisure and hospitality; government; and construction.
- While job losses nationwide have dissipated, the weakness in the labor market has been compounded by lackluster job creation in the private sector during the previous administration's eight-year tenure.
- As the economy recovers from the Great Recession, service-providing industries are projected to add the most jobs between 2008 and 2018, with the largest gains in professional and business services, education, health care and social assistance, and State and local government. Within the goods-producing sector of the economy, only the construction industry is projected to add jobs above its 2008 level.

EMPLOYMENT

- The unemployment rate in Alabama was 10.8 percent in May 2010, up 6.9 percentage points from December 2007, but down from its most recent peak of 11.1 percent reached in February 2010.
- 226,000 Alabama residents were counted among the unemployed in Alabama during May 2010.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 1st quarter of 2009, inflation-adjusted total personal income in the United States declined 2.5 percent. Most recently, in the 1st quarter of 2010, total personal income remained 2.6 percent below the 4th quarter 2007 peak.

- Real per capita personal income (in 2005 \$) in Alabama was \$30,302.80 in the 1st quarter of 2010, down from \$30,946.00 in the 1st quarter of 2008.

- The median price of single-family homes in Alabama was \$203,500 in 2008, compared to \$250,000 nationwide.
- As of the 1st quarter of 2010, 2.2 percent of all mortgages, including 7.5 percent of subprime mortgages, were in foreclosure in Alabama.
- Housing starts in Alabama totaled 14,800 units (seasonally adjusted annual rate) in April 2010, an increase of 8.0 percent from March.
- Within the South census region, which includes Alabama, sales of new single-family homes totaled 278,000 units in April 2010, an increase of 10.8 percent from March. Sales of existing single-family homes increased 9.6 percent to 1,940,000 units (at seasonally adjusted annual rates) from March to April 2010.

How Does Alabama Compare To Other States?

Workers across the country have been hard hit by the Great Recession. This chart allows you to compare Alabama to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Alabama over the course of the recession (shown along the vertical axis) measures the toll the recession has taken on the job supply in Alabama.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates lower than the national average and smaller job losses over the recession.
