

## Economic Overview And Outlook: Illinois

### JOBS

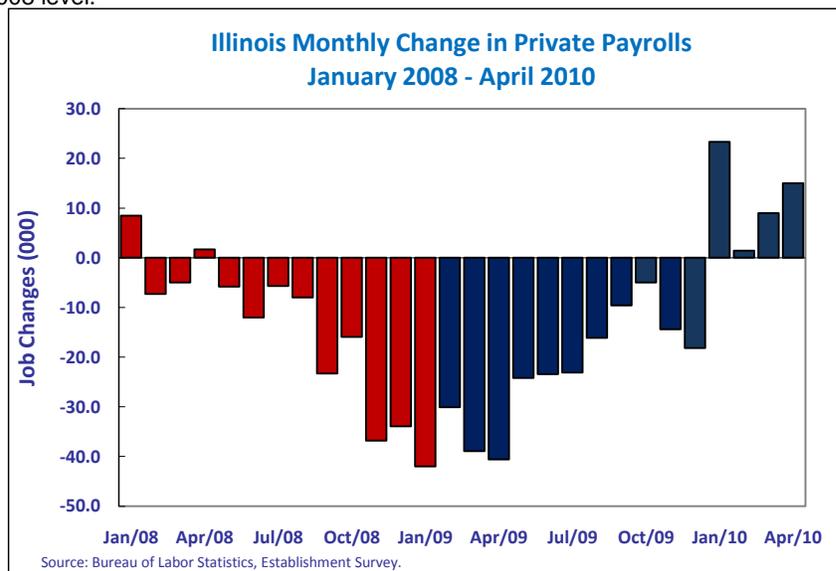

- Across the country, job losses have slowed dramatically since President Obama took office, nearly coming to a halt. Congress and the Administration worked swiftly to pass the American Recovery and Reinvestment Act, which has boosted employment by an estimated 2.8 million jobs since it was enacted.
- The President's Council of Economic Advisers estimates that investments made through the Recovery Act have boosted employment in Illinois by 131,000 jobs through the 1st quarter of 2010.
- In Illinois, employees in the construction, manufacturing, and information services sectors faced the largest job losses (as a percent of employment within an industry) over the recession. The sectors in Illinois that experienced employment increases since December 2009 include other services, professional and business, and education and health.
- While job losses nationwide have dissipated, the weakness in the labor market has been compounded by lackluster job creation in the private sector during the previous administration's eight-year tenure.
- As the economy recovers from the Great Recession, service-providing industries are projected to add the most jobs between 2008 and 2018, with the largest gains in professional and business services, education, health care and social assistance, and State and local government. Within the goods-producing sector of the economy, only the construction industry is projected to add jobs above its 2008 level.

### EMPLOYMENT

- The unemployment rate in Illinois was 11.2 percent in April 2010, up 5.7 percentage points from December 2007, but down from its most recent peak of 11.5 percent reached in March 2010.
- 753,000 Illinois residents were counted among the unemployed in Illinois during April 2010.

### EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 1st quarter of 2009, inflation-adjusted total personal income in the United States declined 2.5 percent. Most recently, in the 4th quarter of 2009, total personal income remained 2.8 percent below the 4th quarter 2007 peak.
- Real per capita personal income (in 2005 \$) in Illinois was \$37,538.90 in the 4th quarter of 2009, down from \$39,609.50 in the 4th quarter of 2007.

### HOUSING

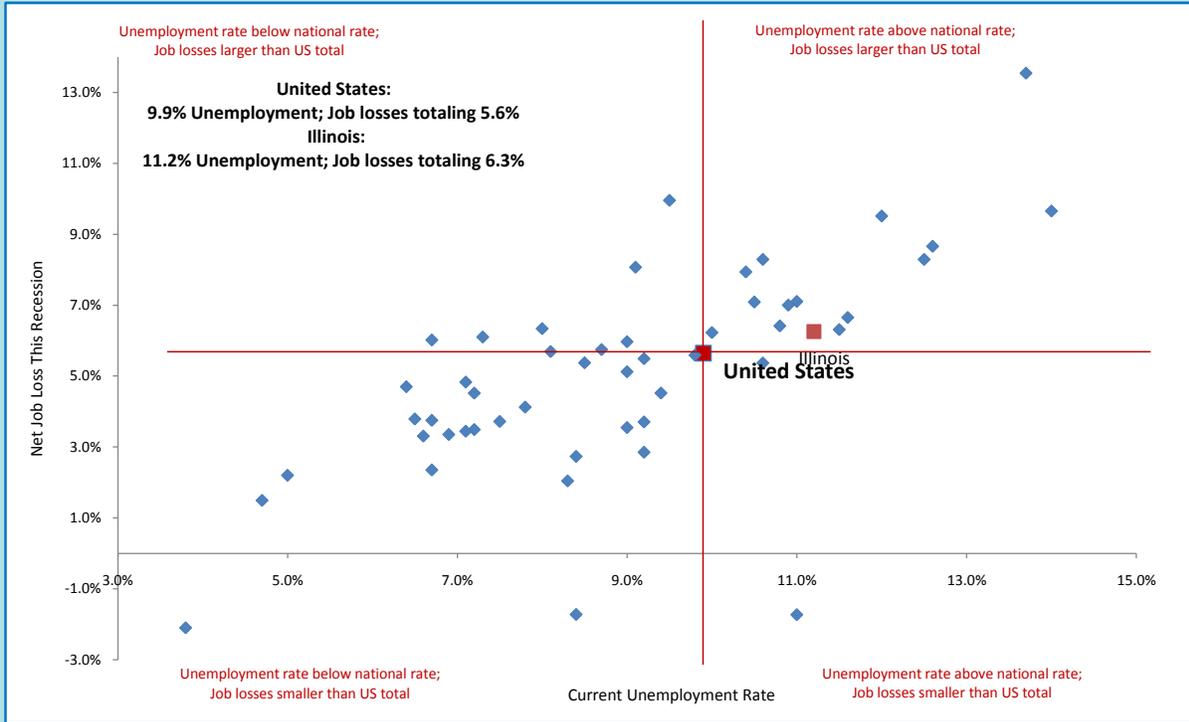

- Actions taken by Congress and the Administration have stabilized plummeting home prices, which fell 30.8 percent nationwide from the peak in March 2006 to the trough in April 2009. In Illinois, home prices fell 23 percent between March 2007 and December 2009, peak to trough. Most recently, home prices decreased 0.61 percent in the state between November and December 2009.
- The median price of single-family homes in Illinois was \$216,100 in 2008, compared to \$250,000 nationwide.
- As of the 1st quarter of 2010, 5.9 percent of all mortgages, including 19.0 percent of subprime mortgages, were in foreclosure in Illinois.
- Housing starts in Illinois totaled 8,770 units (seasonally adjusted annual rate) in March 2010, a decrease of 44.6 percent from February.
- Within the Midwest census region, which includes Illinois, sales of new single-family homes totaled 49,000 units in March 2010, an increase of 4.3 percent from February. Sales of existing single-family homes increased 7.9 percent to 1,090,000 units (at seasonally adjusted annual rates) from February to March 2010.

## How Does Illinois Compare To Other States?

Workers across the country have been hard hit by the Great Recession. This chart allows you to compare Illinois to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Illinois over the course of the recession (shown along the vertical axis) measures the toll the recession has taken on the job supply in Illinois.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates lower than the national average and smaller job losses over the recession.
